

Palletizing Solutions

Automatic multi product pallet stacking

Up to 10 different products stacked per Cell

Scalable High capacity system,

Complete Turn-key solution

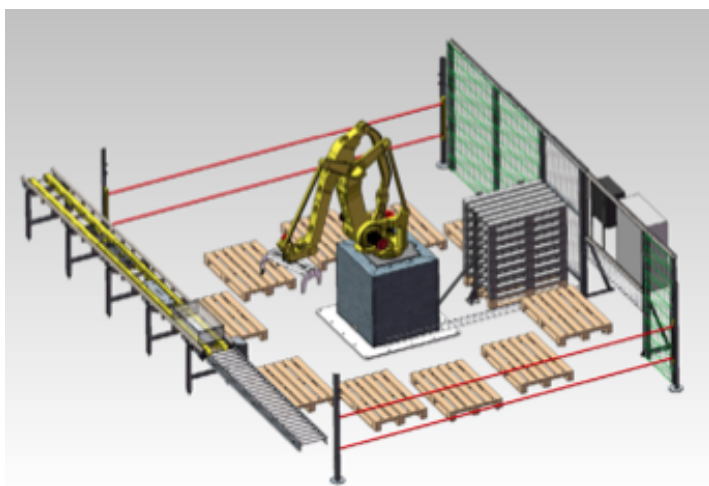

<http://youtu.be/K1FVFuap7k8>

Automate your palletizing process with a robotic solution from Samey.

Using the latest robot technology available, Samey delivers a box palletizing system for use in the salmon and fish industry. The system is designed to stack products on up to 10 pallets per cell simultaneously and handle a range of different sizes and products concurrently.

The system is scalable and can be extended with additional robotic cells adding both capacity and product flexibility.

Key benefits

- High capacity and fully automated
- Minimum operational cost
- Simple product loading configuration
- Scalable, capacity can be added over time
- Integrates with labeling and tracking systems
- Operational reliability

Technical information

Floor space (per cell):

30 - 100 m²

Ceiling height:

min 3,5 m.

Electrical power:

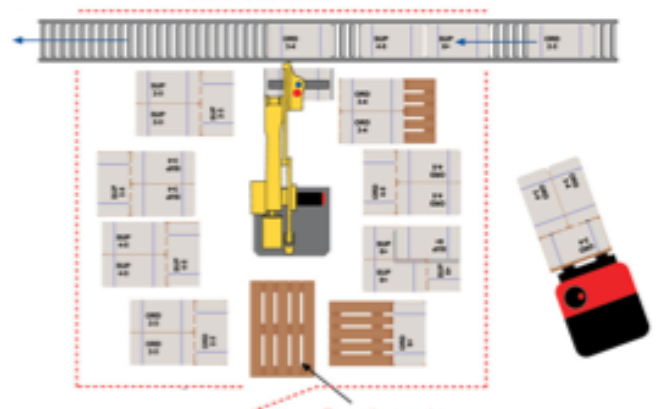

3x400 V 32 A

Capacity (per cell):

450 - 720 boxes pr/h.

Solution examples

Floor loading

Fully automatic
